***"A Seamless Extension of Your Team"***

**Leverage outsourcing through a trusted partner for any software project.**

*“Optimus has provided valuable resources and knowledge in supporting Mobify to deliver exceptional mobile experiences for our customers. Initially, Optimus worked as an extension of our testing team and provided practical daily feedback on defects. We were impressed with Optimus’ responsiveness, detail and dedication, and we’ve since expanded our relationship to include mobile development. Optimus has become an invaluable partner and continues to provide Mobify with high-quality software development and testing services.”*

Benjamin Terrill, VP of Customer Success  
**Mobify**

The world of technology is rapidly evolving. Organizations must continue maintaining and enhancing their current technology infrastructures while also embracing key trends such as mobile, cloud, business intelligence, big data and DevOps. To include new technologies, companies require technical expertise; but internal resources are often short.

Trying to maintain a broad skillset of technologists on staff can be expensive and certain technical skills might not justify a full time position. Organizations are keen to benefit from the knowledge, scalability and flexibility of leveraging a global workforce to extend their own resources. Optimus Information helps address these needs with outsourcing solutions that help companies deliver high quality products and services within budget and on time.

## Our Services

### FULL STACK DEVELOPMENT

Software development, maintenance and professional services across segments including web, mobile, SaaS, cloud, desktop and shrink wrapped products.

### MOBILE DEVELOPMENT

Native, hybrid and mobile web application development, design and migration services for iOS, Android, Windows Phone and HTML5.

### BUSINESS INTELLIGENCE

Data management, data warehousing, reporting services, dashboarding and visualization for the large amount of data coming from the web, IoT and elsewhere.

### SOFTWARE TESTING

Manual and automated testing for mobile, web, SaaS, cloud and desktop, including functional, compatibility, performance and security testing.

# The Optimus Advantage

The Optimus Information model is designed to allocate the right mix of local and offshore resources in order to optimize expertise, speed and cost. We provide Outsourcing-as-a-Service (OaaS), the ability for development teams to quickly add specialty skills to a development team without incurring long-term costs. Our global team is made up of well-rounded experienced professionals, allowing us to work on complex solutions requiring diverse expertise. The result for our customers is the capability to far better manage resource capacities and outcomes.

## Technical Expertise

Optimus Information partners with leading technology vendors to provide our clients with the most current solutions in the marketplace. We have technical expertise in the leading open source and proprietary software platforms. Optimus is a Microsoft Gold Partner.

## Enterprise Experience

Our background in enterprise solutions means we are focused on delivering high-quality software with corporate impact. Optimus has experience working with regulatory requirements and standards such as HIPPA, PCI, SOX, CMMI and ISO.

## Hybrid Delivery Model

Our model is designed to allocate the right mix of local and offshore resources in order to optimize expertise and speed to help clients around the world. With offices in North America and India, Optimus has the capability to design, develop, test, deploy and support complex systems wherever they are needed.

## Scalability

Our model gives clients a scalable partner that can help manage risks during various development stages. We can scale resources quickly in short notice and bring a variety of expertise to the table as needed. Clients often require part-time assistance from several different types of experts - we offer this kind of flexibility.

## Engagement Process

*“Optimus Information was recommended as a reliable, experienced and mature outsourcing company. Optimus provided the benefit of a local presence with the cost savings of an offshore development team. After studying the company’s references and expertise we decided to hand our intranet web application project over to Optimus. After successful project completion we established an ongoing software maintenance relationship with Optimus and they remain an invaluable partner.”*

Steve Baker, President  
**United World Transportation**

## **ENGAGEMENT MODEL**

Optimus Information works as a seamless extension of your team. We can work on-site or at our own offices based on client preferences and needs. We follow Agile development processes and act as an extension of your staff in a “one-team, one-process” approach.

## **INDUSTRIES**

Optimus Information possesses comprehensive capabilities across all industries and business functions and has strong knowledge of vertical domains including agriculture, utilities, financial services, hospitality, public sector, technology, transportation and more.

## **CLOUD SOLUTIONS**

Optimus has taken a leadership position in providing solutions for the cloud via AWS, Azure and Google Cloud. All our services are offered using either traditional data centers or the cloud based on client need, preference and cost-benefit analysis.

Headquartered in Vancouver, Canada with delivery centers in Canada and India, we work as a trusted partner to medium and large businesses to solve their software and technology challenges. With an experienced team Optimus Information provides global organizations with scalable, flexible and cost efficient solutions. Optimus Information provides global reach with a local presence.
