

DEVOPS PACKAGED OFFERS

As more organizations are digitally transforming themselves, there is a shift toward Cloud, Agile, and DevOps. DevOps has become an integral part of the overall digital infrastructure and the way software is developed, tested, deployed, and run. As modern systems are becoming increasingly complex, Optimus Information can help you establish the necessary people, skill sets, processes and tools to support these systems.

Optimus information has developed three packaged offers that can jump-start your DevOps journey using Microsoft's Cloud Adoption Framework.

DEVOPS JOURNEY

*The 2 week assessment is included in this offer

 Digital & App Innovation Azure	 Infrastructure Azure	 Data & AI Azure
Specialist Migrate Enterprise Applications to Microsoft Azure	Specialist Infra and Database Migration	Specialist Infra and Database Migration

Optimus Information is a premier Microsoft Cloud Partner offering a comprehensive suite of cloud solutions and services to businesses. With a team of highly skilled professionals and a client-centric approach, Optimus delivers innovative and tailored cloud solutions that drive digital transformation, enhance productivity, and empower organizations to achieve their strategic goals.

Email us at info@optimusinfo.com to set up a complimentary 1-hr consultation.

As more organizations are digitally transforming themselves, there is a shift toward Cloud, Agile, and DevOps. DevOps has become an integral part of the overall digital infrastructure and the way software is developed, tested, deployed, and run.

As modern systems are becoming increasingly complex, establishing the necessary people, skill sets, processes and tools to support these systems is vital. Using Microsoft's Cloud Adoption Framework, Optimus Information guides customers through their DevOps adoption journey to provide a valuable impact on their system and processes.

Performing a thorough assessment of where you are now and where you want to eventually be, is the first crucial step in the DevOps adoption journey.

DEVOPS ASSESSMENT

OUR APPROACH

- Assess your current DevOps practices maturity level (People, Processes, Tools) using Microsoft's Cloud Adoption Framework
- Perform a gap analysis to determine needed best practice for your DevOps profile

OUTCOMES

- Accelerated DevOps best practices adoption
- Aligned organization and stakeholders

DELIVERABLES

- Documented current state DevOps profile.
- List of recommendations as to what needs to be done to modernize your DevOps practice using Azure DevOps and GitHub Actions.

2 WEEKS | \$10,000

Optimus Information is a premier Microsoft Cloud Partner offering a comprehensive suite of cloud solutions and services to businesses. With a team of highly skilled professionals and a client-centric approach, Optimus delivers innovative and tailored cloud solutions that drive digital transformation, enhance productivity, and empower organizations to achieve their strategic goals.

DEVOPS

ASSESSMENT, STRATEGY, & ROADMAP

As more organizations are digitally transforming themselves, there is a shift toward Cloud, Agile, and DevOps. DevOps has become an integral part of the overall digital infrastructure and the way software is developed, tested, deployed, and run.

As modern systems are becoming increasingly complex, establishing the necessary people, skill sets, processes and tools to support these systems is vital. Using Microsoft's Cloud Adoption Framework, Optimus Information guides customers through their DevOps adoption journey to provide a valuable impact on their system and processes.

Performing a thorough assessment of where you are now and where you want to eventually be, is the first crucial step in the DevOps adoption journey.

DEVOPS ASSESSMENT, STRATEGY, & ROADMAP

OUR APPROACH

- Conduct a strategic assessment of where you are now, where you want to go, and why (business motivation) using Microsoft's Cloud Adoption Framework
- Prioritize the recommendations from the assessment and produce a roll-out plan

OUTCOMES

- Assessment, strategy, and roadmap based on your ambitions, priorities, and organizational capabilities.
- Accelerated DevOps best practices adoption
- Aligned organization and stakeholders

DELIVERABLES

- Documented assessment, strategy, and Azure DevOps and GitHub Actions adoption roadmap
- 90 days plan
- Skills readiness plan

3 - 4 WEEKS | \$25,000

Optimus Information is a premier Microsoft Cloud Partner offering a comprehensive suite of cloud solutions and services to businesses. With a team of highly skilled professionals and a client-centric approach, Optimus delivers innovative and tailored cloud solutions that drive digital transformation, enhance productivity, and empower organizations to achieve their strategic goals.

As modern systems are becoming increasingly complex, establishing the necessary people, skill sets, processes and tools to support these systems is vital. Using Microsoft's Cloud Adoption Framework, Optimus Information guides customers through their DevOps adoption journey to provide a valuable impact on their system and processes.

Once it is decided that action is required, a proof-of-concept is a good way of taking a "test ride" to see what the rest of the journey is likely to be like.

DEVOPS PROOF-OF-CONCEPT

OUR APPROACH

- Lay the foundation of all future work with the POC using the previous assessment, roadmap, and plan as a guide
- Set up Azure DevOps accounts and an initial DevOps project to establish an experimental work area
- Set up a small web development project in terms of development environment and tools, work items, boards, sprints, CI/CD pipelines, and code repositories to use as a demonstration
- Organize resources, determine responsibilities, and start work
- Gather and internalize lessons learned once the work is completed

OUTCOMES

- Accelerated adoption by reducing knowledge gaps and improving processes
- Aligned organization and stakeholders
- Best practices in place for Azure DevOps

DELIVERABLES

- Presence on Azure DevOps and GitHub Actions
- Working set of DevOps artifacts, repositories, and pipelines that can be used as a template for further projects
- Learnings document that captures lessons learned from the proof-of-concept

3 - 4 WEEKS | \$25,000
